New Bermuda Targa Hard Top For MGF/TF

This sensational and unique product, designed to be used on the 2006 model MG TF, was never put into production due to MG going into receivership. Mike Satur have the exclusive opportunity to complete the tooling and produce a limited number at a very special price!

The Bermuda Targa Top completely transforms the looks and the way the car can be used. The painted roof section is made from high quality aluminium and has a stunning panoramic tinted glass roof section made in three pieces. The rear screen is fixed and the two sections over the occupants can be removed and stored in the boot. This makes the Bermuda an all year round top that is cosy in winter, ideal for summer use and secure touring abroad.

If required the soft top assembly can be removed, allowing more storage capacity in the rear.

The Bermuda Targa is manufactured on high quality tooling that was designed for the production line and meets all current legislation. To reserve one of these unique Targa Tops please fill in your details together with car registration, year of manufacture and paint code on the back of this leaflet.
